Power Plant
Emerging Information
October 22, 2009

You are cordially invited to the Valley National Gases Power Plant Gas Information Seminar. This seminar has been designed to demonstrate new technology that is available to manage assets including cylinders and a comprehensive discussion on EPA Protocol regulations and trends.

Valley National Gases is honored to have the Kevin Wassel (Matheson Tri-Gas Product Manager) discuss and demonstrate cylinder management that can track and monitor pressure in cylinders remotely. On-line ordering and supply chain advances will also be reviewed. Ron Geib (Matheson Tri-Gas Technical Marketing Manager for Specialty Gas Group) will present on the current situation climate of EPA Protocols and Government Regulations.
